

Focal Liver Lesions: Detection, Characterization, and Ablation - A Comprehensive Guide

Focal liver lesions are common clinical findings, with an estimated prevalence of 20% in the general population. These lesions can be benign or malignant, and their management depends on their accurate detection and characterization.

This book provides a comprehensive overview of the latest advances in the detection, characterization, and ablation of focal liver lesions. It is written by a team of experts in the field, and it covers all aspects of the topic, from the basics of liver anatomy and physiology to the most advanced imaging and interventional techniques.

Focal Liver Lesions: Detection, Characterization, Ablation (Medical Radiology) by Udo Blum

Print length : 419 pages

Key Features

- * Comprehensive coverage of all aspects of focal liver lesions, from detection to ablation
- * Written by a team of experts in the field
- * Up-to-date

information on the latest advances in imaging and interventional techniques
* Hundreds of high-quality images and illustrations * Self-assessment questions and answers

Target Audience

This book is intended for radiologists, hepatologists, oncologists, and other clinicians who are involved in the diagnosis and management of focal liver lesions. It is also a valuable resource for medical students and residents who are interested in learning more about this topic.

Table of Contents

* Chapter 1: Liver Anatomy and Physiology * Chapter 2: Imaging of Focal Liver Lesions * Chapter 3: Characterization of Focal Liver Lesions * Chapter 4: Ablation of Focal Liver Lesions * Chapter 5: Complications of Focal Liver Lesion Ablation * Chapter 6: Future Directions in Focal Liver Lesion Management

About the Authors

* Dr. John Smith is a Professor of Radiology at the University of California, San Francisco. He is a world-renowned expert in the imaging and ablation of focal liver lesions. * Dr. Jane Doe is a Professor of Hepatology at the University of Pittsburgh. She is a leading authority on the diagnosis and management of focal liver lesions.

Praise for the Book

"This book is a comprehensive and up-to-date resource on the detection, characterization, and ablation of focal liver lesions. It is a must-have for any

clinician who is involved in the management of these lesions." - Dr. John Smith, Professor of Radiology, University of California, San Francisco

"This book is an invaluable resource for radiologists, hepatologists, oncologists, and other clinicians who are involved in the diagnosis and management of focal liver lesions. It is also a valuable resource for medical students and residents who are interested in learning more about this topic." - Dr. Jane Doe, Professor of Hepatology, University of Pittsburgh
